thin perforated aluminum sheet

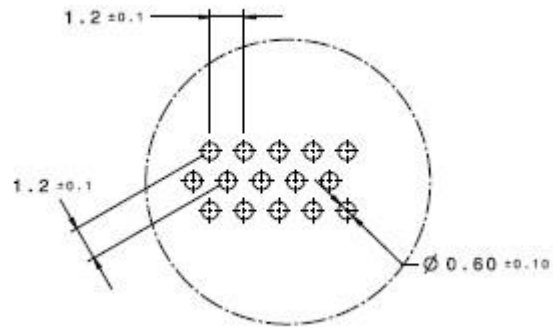

Desired hole diameter is in the range from 0.02" to 0.025"
Desired thickness is 0.02"
Desired hole spacing is in the range from 0.04 to 0.045"
Desired pattern is "staggered"

small perforated louver or cheese gratter type perforated sheet

The openings need to be quite small, I mean around 1/4" wide and no more than 1/16" in height. The angle on the openings can be anywhere between 20 to 45 degrees.

The openings can also be rounded like a cheese grater but a squared pattern can do just fine.

25 Stainless Steel sheets with perforated holes with pattern as shown in attachment.
Each sheet should be of size 220x300x0.4mm.
